LIVE TRAVEL INFORMATION

JOURNEY for Local Authorities

Modern public transport passengers are no longer willing to turn up at a bus stop and wait for a bus that may or may not show up on time. Accurate, reliable and available information cannot be viewed as a 'nice to have': today's passengers demand high quality information available wherever and whenever required.

If people are to choose public transport ahead of other options they must have access to accurate, trusted and easily understood information. This information process can be a journey in itself, with a variety of considerations such as: How do I reach my destination? What are my options? Is there a less expensive option? Where do I board? Is the bus delayed? Will I get a seat? Are there any disruptions?

It is vital that local authorities are able to provide this kind of information if passengers are to make the sustainable choice to use public transport. Trapeze's Journey enables authorities to deliver all of the above and more, retaining control over the information provided, as well as the ability to change information at a moment's notice.

TRUE REAL TIME

Journey represents a step-change in journey planning. Rather than layering on top of the static schedule, Journey uses live data and plans in true real time.

Passengers can trust Journey to provide them with up-to-the-minute information that will make their trips simple and stress-free, increasing confidence in the public transport network as a viable travel option for everyone.
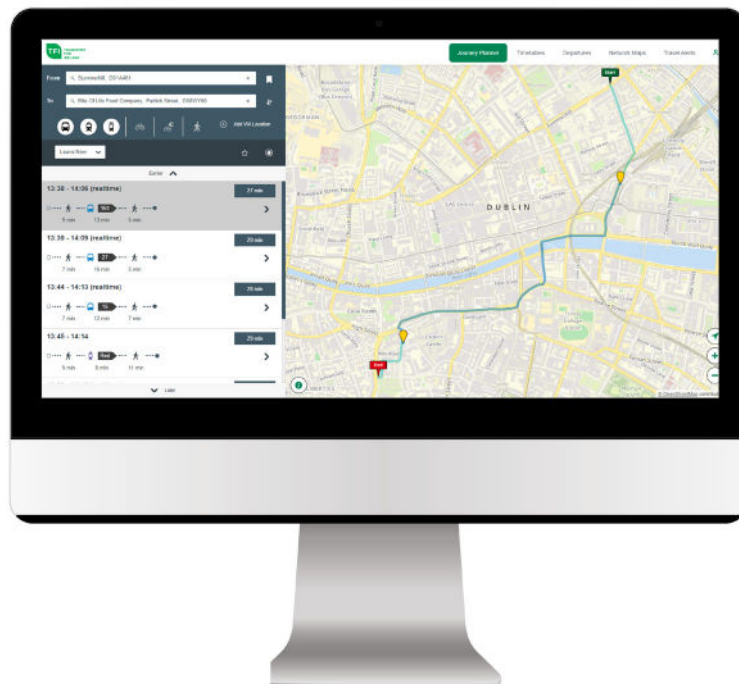

Overview

Elements

- View departures in real time

- Interactive map

- Plan a journey

- View routes

- Manage disruptions

- Multimodal: bus, train, ferry, metro, tram, cycles, walking, e-scooters, micromobility

- Location aware: see nearby departure information

- Link to additional information

- Save favourite stops - access departure information with one click

Key Benefits

Simple: easy to manage and update

- Fast and accurate: information is live the next day

- Empower passengers to choose public transport

- Provide accurate information through periods of disruption

- Retain control over your transport information

- Maintain the client relationship

- Responsive web platform - works on all devices

- Plans in true real time, increasing confidence in public transport
